Art Unit: 1651

1. Receipt is acknowledged of the election filed April 09, 2002.
2. Claims 8-14 remain pending in this application.
3. Applicant has elected *Escherichia* as the genus for the microorganism.
4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 8-9, 12 and 13 are rejected under 35 U.S.C. 102(b) as anticipated by Ivanisevic et al; Filutowcz; Drlica et al; or Hallett et al.

Each of the references is considered to clearly anticipate the claimed microorganism(s) absent a showing to the contrary especially since *Escherichia* microorganisms are known to produce L-amino acids.

Art Unit: 1651

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 10 and 11 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for mutagens of the genus *Escherichia*, does not reasonably provide enablement for the broad claimed "microorganism". The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and practice the invention commensurate in scope with these claims.

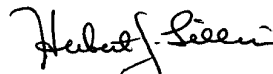

6. Claim 14 is allowed in view of the fact that the microorganism is an *Escherichia* mutagen, which has both resistances to DNA gyrase inhibitor and to an aminoquinoline derivative as indicated in Example 1. It is also requested that the statement of availability of the microorganism(s) without any restrictions be placed on the record for this instant application.

7. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.
